

# Arduino Pinger Project

February 18, 2014

Text in sketch is color coded to what function it controls.

Color Key:

Pinger – Ultrasonic Range Sensor

Serial LCD Screen

Audio Player

LED Spots

LED Eyes

Servos

Standard Code

Notes

---

```
/*
 * Arduino Pinger Project
 *
 * Code for Milburn's Haunted Manor wall of bones and creatures scare.
 * The idea behind this sketch is to use the ultrasonic range finder to control
 * an event at three pre-set distances from the sensor.
 * The guests walk down a hall and come into the sensor range of the ultrasonic sensor.
 *
 * They get within the first increment range and set off the first series of events.
 * The critters start to move, a LED spot comes on, the eyes start to glow dimly.
 * Eerie sounds start coming out of the walls.
 * As the people progress down the hall this happens in two additional steps, the eyes glowing
 * brighter with each triggered step.
